

REMARKS/ARGUMENTS

The present amendments to the specification are for the purpose of inserting patent number information where only the underlying application for U. S. patent was identified. Additionally, obvious typographical error is corrected.

At page 5, line 17, the term "attach" has been changed to - -attack - -; at lines 20-22, - - patent No. 7,108,196 - - is inserted.

At page 6, lines 13-15, - - patent No. 6,736,153 - - is inserted.

At page 10, line 2, the term "of" is deleted.

At page 11, lines 10-12, - - U. S. patent No. 7,108,196 (supra) - - has been inserted; at lines 22 and 23, - - patent No. 6,736,153 - - is inserted.

At page 13, line 9, the term - - Fig. 3. - - is inserted following the term "in" at the end of the line; at line 10 before "fluid", - -A - - is inserted.

At page 16, line 20, after "array" the term - - of - - is inserted.

At page 17, line 5, the term "Fig." is changed to - - Figs. - -.

At page 19, line 13, the term "arrow" is changed to - - line - -; at line 16 the term "arrow" is changed to - - line - -; and at line 27 the term "arrow" has been changed to - - line - -. Those changes are intended to conform the description to the drawing.

At page 24, line 27, the term "pin" (second occurrence), is changed to - - pins - -; at line 30, the term "(SDA)" is changed to - - (SDO) - -.

Typographical error is corrected in two claims. In this regard, at claim 1, line 16, the term "having" is deleted; and at line 19, the term - - composite - - is inserted before the terms "control assembly". The same properly presented paragraph appears in claim 18.

At claim 4, line 1, the terms "reservoir and" are removed to provide proper antecedent basis to claim 1.

As is apparent, there is no addition of new matter nor alteration of the claims in a substantive manner with the amendments. An issue fee and appropriate formal paper are submitted herewith.

Respectfully submitted,

Date: 8 Dec 2006

Gerald L. Smith
